# Accreditation Courses Description

Accreditation Course	Brief Overview
<b>Assessor Skills &amp; Centre Manager</b>	The ASCM course is internationally recognized by the British Psychological Society (BPS) and enables delegates to develop the knowledge and skills necessary to become a qualified Assessor in a range of Assessment and Development Centre exercises and managing the process of designing and implementing Assessment and Development Centers.
<b>PAPI &amp; Logiks (TUOP &amp; TUOA)</b>	PAPI certification (a BPS accredited training course) equips delegates with the knowledge and skills to understand an individual's work-based personality and preferences. Delegates will be introduced to PAPI3, a comprehensive work-based personality measure that can be used across assessment and development processes. Logiks certification allows delegates to use Logiks, a suite of evidence-based ability tests, to accurately determine an individual's cognitive ability. The course will also equip individuals with the knowledge, skills and confidence to administer ability assessments in line with best practice.
<b>BPS Qualification in Occupational Testing (A&amp;P)</b>	This certification qualifies delegates to use a wide variety of ability tests and personality questionnaires from a number of major test publishers including Saville Assessment, a Willis Towers Watson Company, psychometric products. The qualification is internationally recognised demanding the best practice in the use of psychometrics at work, and is suitable for those involved in selection, talent development, coaching or any other application where psychometric assessments are useful. Upon successful application to the BPS, conversion courses to a number of further products will also be made available.
<b>MBTI Certification</b>	The MBTI Step I & II certification enables delegates to gain the knowledge, skills, and tools to help others improve their self-awareness and make constructive use of personality differences. Delegates will also learn how to use the MBTI framework with teams and organizations to boost performance and enhance their communication, decision-making, collaboration, and more.
<b>Strong Interest Inventory</b>	Strong Interest Inventory certification enables delegates to provide their clients, students or employees with dynamic career direction and insight into options that align with their interests and abilities. The certification is very useful for career counselors, career coaches and human resources professionals, as it delivers an additional tool for helping individuals with professional development, engagement, transition, and retention. It can also be a powerful tool for adults transitioning to retirement.
<b>The Resilience Questionnaire</b>	This accreditation course provides individuals with the information and experience required to administer, interpret results and provide feedback on The Resilience Questionnaire.
<b>EIP3 - Emotional Intelligence Profil</b>	This experiential accreditation equips individuals with the knowledge, understanding and confidence to use the EIP3 and EIP360 for development and assessment needs.
<b>Prespectives</b>	This accreditation course equips individuals with the tools and skills to embed cultural capability in the workplace, including how to create a more inclusive climate and to gain confidence in delivering feedback and exploring the six inclusive behaviours.
